

Enterpack

Enterpack is a complete packaging system. The Enterpack system offers a choice of two machine models, the 200 and the 350. The Enterpack 200 can be combined with the rectangular 12 x 18 cm and the round 13 cm seal plates. The Enterpack 350 can be combined with the rectangular 19 x 15 cm and 23 x 19 cm seal plates. Each seal plate can package trays of different heights.

Ideal for packaging meat, fish, nuts, tapas, olives, sauces, ready-made meals, salads, fruit and vegetables. Both hot and cold products can be packaged on the Enterpack. Every pack is leak-proof, airtight and odour-proof. The product is extremely well-presented to the consumer, partly because the film is cut neatly.

The Enterpack is distinguished by the great simplicity of the product packaging. The following three steps ensure that the products are always packaged well:

1. Place the tray with the product on the feed plate;
2. The product drops into the seal plate automatically, the drawer closes, the product is packaged and the drawer opens again;
3. Remove the packaged product from the feed place and remove the residual film.

As the Enterpack performs the packaging automatically and, therefore, always uses constant pressure, every package is of consistently good quality.

Technical data

| | |
|-----------------------|---|
| Machine | Enterpack |
| Models | 200 / 350 |
| Application | Packaging of fresh products in trays |
| Technology | Top-seal |
| Operation | Semi-automatic |
| Capacity | Up to about 8 strokes per minute |
| Electrical connection | 230 V / 50 Hz – 800 W |
| Machine dimensions | 35 x 45 x 41 cm (width x depth x height) |
| Weight | 19 kg |
| Certification | RW TUV GS & CE |
| Trays | Range of Entervessels trays |
| Film | Range of Enterclear film |

The above values are indications and may vary with individual machines.

TEN Packaging supplies innovative and often unique solutions for packaging all types of food. We represent the Fabbri Group, Italian Pack and Enterline manufacturers in the Benelux region. TEN Packaging also has a number of in-house solutions that are offered world-wide.

Advice

TEN Packaging has its own account managers, so that we can offer you good advice on the possibilities of our solutions for the products you need to package.

Technical service

TEN packaging has a service unit covering all the Benelux countries, with engineers operating from their own regions. Our engineers all have broad experience with the systems supplied by TEN Packaging and are therefore able to provide excellent service in installation, maintenance and solving malfunctions.

Parts

TEN packaging has all the usual parts in stock, both in the central parts warehouse and in the engineers' cars and vans. This keeps any downtime in the case of a malfunction to a minimum. TEN packaging gives high priority to the continuity of your business operations.

Preventive maintenance

Preventive maintenance can be performed for every machine supplied by TEN Packaging. Preventive maintenance helps to extend the life of the machine and improve its safety and reliability.

About TEN packaging

The name TEN Packaging is new and was only introduced in 2017. However, our company is not a new one. TEN Packaging arose from mergers of different companies at different times. These companies are Conpax Verpakkingstechniek, Eselbe, Servo-Wrap and R.D. De Jong.
